Application/Control Number: 10/656,231

Art Unit: 2871

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Prior Art Fig. 3 in view of JP 11-326857 (JP'857) cited by Applicant.

Applicant's Prior Art Fig. 3 discloses a method of manufacturing a liquid crystal display constituted by bonding first and second substrates, said method comprising the steps of dropping a liquid crystal on said first substrate; performing an alignment between said first and second substrates; pressing said second substrate on a surface of said first substrate on which said liquid crystal is dropped with a predetermined pressure in a vacuum chamber where the internal pressure is below a predetermined value; and releasing said vacuum chamber into atmospheric pressure; performing an electrostatic suction of said first and second substrates on said first and second surface plates, respectively, after dropping said liquid crystal; dropping a photo-curable resin 143 on said first substrate after dropping sad liquid crystal; and irradiating ultraviolet rays to said photo-curable resin with the state of pressing said second substrate on said first substrate with a predetermined pressure after performing the alignment between said first and second substrates (specification, pages 3-6). Thus, the only difference between the method of Applicant's Prior Art Fig. 3 is the step of

Application/Control Number: 10/656,231

Art Unit: 2871

performing an alignment between said first and second substrates while (at the same time) pressing said second substrate on a surface of said first substrate. The JP'857 discloses in paragraphs 0022, 0025 and 0049-0051 that it is possible to perform alignment between the first and second substrates and at the same time pressing the two substrates. Thus, it would have been obvious to a person of ordinary skill in the art to perform alignment between the first and second substrates and at the same time pressing the two substrates in the method of Applicant's Prior Art Fig. 3 for miniaturizing of a configuration, preventing a location gap and obtaining a highly precise liquid crystal cell, as disclosed in paragraphs 0022 and 0025 of the JP'857.

Claims 2-4 and 7 are allowed for the same reasons set forth in the last Office action.

Independent claim 8 is the combination of claim 1 and allowable claim 2 is allowed for the same reasons as those of claim 2. Dependent claims 9-11 are also allowed since they depend on the allowed claim 8.

## Response to Applicant's remarks

Applicant argued that the JP"857 does not disclose the pressing of the two substrates because the Abstract discloses the pressurizing means 68 (an exhausting means). Applicant's arguments are not persuasive because paragraphs 0049-0051 of the JP'857 do disclose the *application-of-pressure means* 68 (p.0049), a *pressure welding* being pressurized and the *spacing* between both substrates 12 and 13 being *shortened* (p. 0050), and since it was *compressed* by the *application-of-pressure means* 68 (p. 0051).

Thus, Applicant's arguments filed 07/22/05 have been fully considered but they are not persuasive for the above reasons.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Tai Duong at telephone number (571) 272-2291.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
